

Design und Function

STAPLA is a very minimalistic, yet functional shelving system. The modular system offers a big range for designing and storage options.

Montage

Assembling STAPLA is very easy. You only need a screwdriver. Unpack BAENKK, put the four wooden feet into the openings from the seat and palm them on. Once you need more space for your things you can stack one piece to another. From time to time you can create a specific and individual shelf appropriate to your needs.

Dimensions

STAPLA is a storage system, book shelf or a beautiful object close to the wall or can be used as a beautiful, extendable room divider.

74,5 x 100 x 30 cm (H x W x D)
