

Design und Function

Surprising function amongst a clear design language makes up the hanging wardrobe STEQS. Thanks to the removable hooks, you can design the product exactly to the needs of your living spaces.

The holes for the hooks are slightly angular, so the hooks are fixed without the need for any mechanical tools.

Cloaks, jackets, hats, shirts or even towels – STEQS is a very flexible design wardrobe for several different purposes. The hanging wardrobe is available in massive oak wood and comes in a long and shorter version.

Montage

In the delivery pack, you'll find two plugs and two screws. Drill the holes in the right positions, put the plugs and the screws into the wall and fix STEQS on the backside.

Use STEQS on walls only in good conditions.

Dimensions

As with all komod products, the design proportions and dimensions have been developed with a fine feel for composition and function, in order to position STEQS in a wide variety of positions and rooms.

height: 12 cm | width: 57,5 cm | depth: 4,5 cm
